

The product is thermoplastic rubber sheeting made of an advanced composite material (extrusion grade) based on recycled rubber and plastics. This material possess following properties:

- Thermoformability
- Weather resistance
- Superior impact strength
- Low specific gravity
- Environmentally friendly
- The look and feel of rubber

PROPERTY	ASTM TEST METHOD	VALUE
Color		Black
Hardness, Shore A	D2240-91	83
Tensile Strength, Mpa	D412-12	
(Specimens tested at 500 mm/min, using a 50 mm gauge length)		
With Grain		4.6
Across Grain		4.2
Ultimate Elongation	D412-92	
(Specimens tested at 500 mm/min. using a 50 mm gauge length)		
With Grain		140
Across Grain		240
Tear Strength	D624-91	
(Specimens tested at 500 mm/min.)		
With Grain		36.2
Across Grain		33.3
Flammability	FMVSS-302	.41 in/min.

NOTE: The result can vary depending on the production batch!
